**“Developing the Conscious Leadership Mindset for the 21st Century”
Wins Bronze “Living Now” Book Award**

“Developing the Conscious Leadership Mindset for the 21st Century” has won the Bronze Living Now Book award in the “Motivation and Self-Improvement” category.

Launched in August of 2008 by IndependentPublisher.com and Jenkins Group, the Living Now Book Awards celebrate the innovation and creativity of newly published books that can help us improve the quality of our lives. Each year, “books for better living” are chosen for their unique ability to enrich readers’ lives and promote global sustainability. The Living Now Awards medalists are an exceptionally impressive list of inspiring books, a testament to the dedication of authors and publishers today.

Since 2005, Jeffrey Deckman, founder of Capability Accelerators and a first-time author, has been developing new leadership systems and organizational design models that both facilitate and expedite the transformation from outdated command and control models to those designed specifically for the modern worker in the modern workplace.

The book won the awards because of its unique design and the powerful way it leads the reader through a process of self-discovery and consciousness raising exercises that are easy to grasp and are highly applicable in today’s no-nonsense leadership environment.

The book is also a workbook that provides life-changing tools that helps leaders develop the new “Conscious Leadership in Action” mindsets being demanded in the 21st Century. The book, and its associated online training course, changes the leadership paradigm from “power and control” to one that focuses on highly effective communication, collaboration and facilitation of the collective genius and energies of teams.

As Deckman writes, “We must replace outdated leadership with respect-based leadership or suffer the loss of productivity, profitability and the employees that create both.”
